POROUS PARTS. [1962] 7p.

Order from OTS or SLA \$1.10

62-16359

Trans. of Belgian patent 601,082 by Consolidated Beryllium Ltd., publ. 8 Mar 61 (priority: England, 9 Mar 60).

DESCRIPTORS: *Porous materials, Production, *Sponges, Expanded plastics, *Refractory materials, Polymers, Beryllium compounds, Structures, Manufacturing methods.

The invention consists of a process for the manufacture of porous parts according to which a spongy piece of the communicating cell type is impregnated with a suspension or a dispersion of refractory particles in a liquid. The part formed is treated in order to eliminate the liquid and the material constituting the sponge and the refractory particles are agglomerated by calcination.

DESCRIPTORS: Personnel, Psychology, Test methods,
Effectiveness.

The purpose of this article is to give a summary of
the more important work undertaken with this tech-
nique and to show its possibilities of application in dif-
ferent fields. We are particularly going to consider
the results obtained in recent and fundamental re-
search concerning the technique itself. (Author)
